DETAILED ACTION

Election/Restrictions

Based on Applicant's new set of claims submitted in the reply filed on January 3, 2008, the requirement for species election is withdrawn.

Status of Claims

Cancellation of claims 1-16 in the reply filed on January 3, 2008 is acknowledged.

Claims 17-22 are currently pending and are the subject of this office action.

Claims 17-22 are presently under examination.

Priority

The present application is a 371 of PCT/IB03/01418 filed on 04/04/2003, and claims priority to provisional application No. 60/371,330 filed on 04/10/2002.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 17-22 rejected under 35 U.S.C. 103(a) as being unpatentable over Yu et. al. (Blood, Vol. 98(11), 2001:146a, abstract 615, cited by applicant).

Claims 17-22 recite a method of treating Bcr/Abl-positive leukemia resistant to STI571 (Glivec or Imatinib), comprising administering to a patient in need thereof a combination of a) flavopiridol and b) STI571 in the form of a pharmaceutically acceptable salt, and optionally at least one pharmaceutically acceptable carrier, in a synergistically effective molar ratio (flavopiridol/STI571) range of 1:1 to 1:10.

Art Unit: 4173

Yu et. al describe a synergistic combination of flavopiridol and STI571, in a 1:1.3 ratio, to induce mitochondrial damage and apoptosis in Bcr/Abl-positive leukemia cells resistant to STI571 (see entire abstract).

At the time of the invention it would have been prima facie obvious to for a person of ordinary skill in the art to apply the teachings of Yu et. al. (the synergistic effect of flavopiridol and b) STI571 in Bcr/Abl-positive leukemia cells resistant to STI571) to develop a method of treating Bcr/Abl-positive leukemia resistant to STI57, thus resulting in the practice of claims 17-22 with a reasonable expectation of success.

Conclusion

No claims are allowed.
